Wireless Fiber Optic Cable

يكل سالا لة اي و ضالا فاي لال لباك

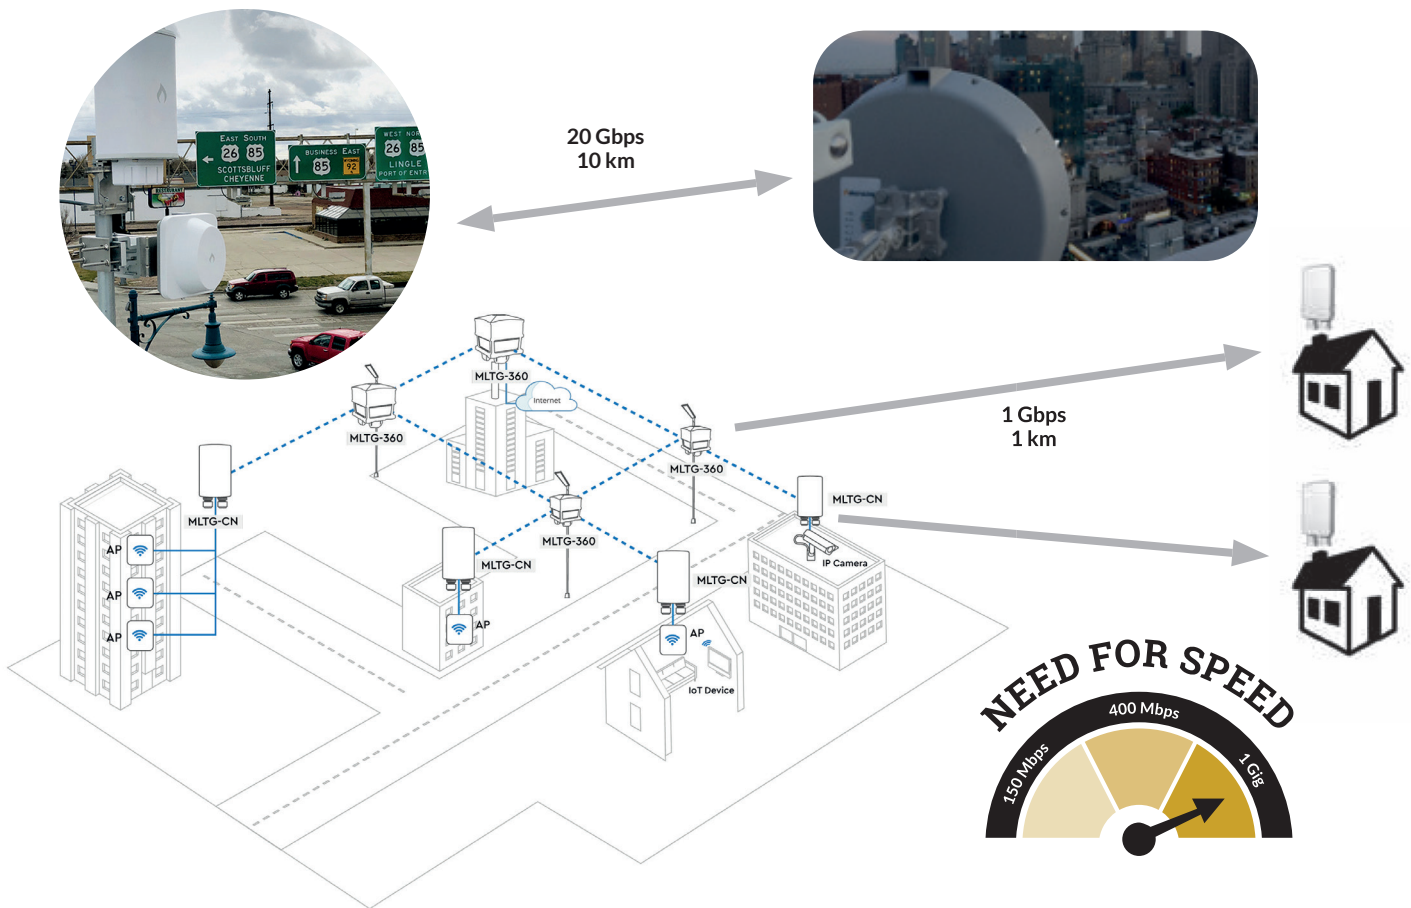

Citizens of all developing countries require fiber optic speed Internet

Wireless performance continues to ride a powerful curve of cost reduction and improved performance.

In mmWave this evolving ability to deliver more Gigabits per second at greater distances while prices continue to fall is coupled with massive market demand. New applications are opening up and existing ones are expanding at a rapid rate.

- Backhaul: Wireless Gigabit Speeds
- Smart Cities: Public WiFi
- Internet Access: To Rural areas
- Security: Video Solutions
